Product ID: RCT 02 1047 EP – High Build Black Epoxy Primer

Product Description & Suggested Uses:
RCT 02 1047 EP is a two component, epoxy primer designed for applications where excellent corrosion, moisture and water barrier properties are required. RCT 02 1047 EP is high solids, high build and especially suitable for marine and water submerged applications. Typical uses include: barges, drilling rigs, tanks, heavy duty structural steel & pipe.

Mixing and Thinning/Reducing Instructions:
Mix 1 parts RCT 02 1047 EP by volume with 1 part RCT 01 1116 AM Hardener. Agitate each component thoroughly before combining. If reducing or thinning is required, please contact your Rapid Cure Technologies (RCT) technical service representative for instructions.

Directions for Use:
Surface must be clean, dry, sound and free of dirt, dust, grease, oils, residues, waxes, water, foreign particles, and any other contaminants that may interfere with coating adhesion and intimate contact with substrate. Steel surface preparation should meet SSPC-SP6/NACE 3. Metal surface must be 5 degrees above the dew point temperature.

RCT 02 1047 EP is designed to be applied by spray, brush, roll or squeegee. Airless spray @ 3500-4500 psi with 0.019-0.027 tips is recommended. If reduction is required, 5-10% Acetone or MEK may be used after both components are mixed together. Pot life is 6 hours @ 75 degrees and significantly reduced at elevated temperatures. Pot life is extended with reduction.

Clean-up:
Clean all equipment immediately after use with MEK or other RCT approved solvents. Use clean solvent only. In case of spill, absorb and dispose of in accordance with local, State, and/or Federal regulations.

Storage & Shelf Life:
Store indoors in original, tightly sealed container out of direct sunlight between 40°F (5°C) and 100°F (38°C), 0% to 90% relative humidity. Warranted shelf life is 12 months from date of manufacture (DOM) in original unopened and properly stored container.
